

POL-SAF-05: Product Safety Hazard and Critical Incident Protocol

Category: Safety Hazard | Version: v3.0 | Status: Active | Date: 2024-01-01

1.0 Critical Safety Triggers

Any report mentioning electrical shock, sparks, battery swelling, fire, explosion, or chemical leakage is automatically designated Priority P0 Critical.

2.0 Mandatory Tier 5 Escalation

All safety hazard complaints must be immediately routed to the Product Safety & Legal Compliance Committee within 30 minutes. Frontline agents are strictly forbidden from dismissing safety reports.
