

POL-SEC-08: Account Security, Unauthorized Access and Data Privacy SOP

Category: Account Security | Version: v2.1 | Status: Active | Date: 2024-01-20

1.0 Account Compromise Protocol

If customer reports unauthorized password change, 2FA bypass, or unrecognized orders, agent must instantly lock user profile and invalidate all active session tokens.

2.0 Identity Verification

Account recovery requires two-factor verification via verified secondary email or government ID submission.
